ABOUT ME

Software Engineer with more than 4 years of experience in development. I'm passionate about creating quality digital products that meet all of the customer's needs. I believe my experience has allowed me to hone my attention to detail and critical thinking skills as well as enhance my communication skills. I'm excited to apply my technical skills to develop applications and systems.

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER

AKKODIS CZ S.R.O. | PRAGUE
JUN 2022 - PRESENT

Currently, I'm working as a Senior Software Engineer. In the last half of the year, I work on a project for automotive, I'm developing a KPI tool that provides receiving data from different sensors and cameras from the car and then makes cleaning synchronized and preprocessing data after that makes calculating and next analyzing data. That tool evaluates the measuring quality from sensors and reports all deviations.

Skills: Python, NumPy, Pandas, Django, FastAPI, PostgreSQL, MongoDB, Docker, ML, Matplotlib, Pytest, Javascript, HTML, CSS, ReactJS, ElasticSearch
